Alberti  
SARONNO (VA)  
ITALY

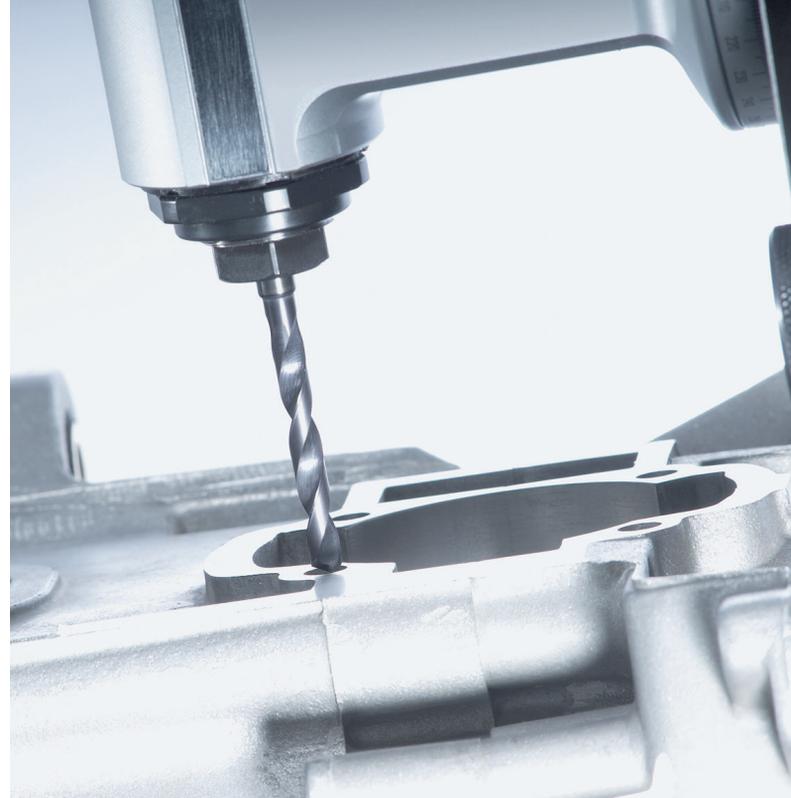

# Alberti®

Only the best for passion

## WHAT WE DO

**ALBERTI IS A SOLUTION PROVIDER FOR DIFFERENT APPLICATIONS TO OPTIMISE THE CAPABILITY OF MACHINE SPINDLE.** Whether you are milling, turning, drilling, threading or reaming we can provide the most suitable tool to complete the machining of complex workpieces without any additional setup. With a simple installation, our range of advanced solutions – including standard as well as tailored-made products-can be retrofitted to almost any machines increasing their flexibility.

All products are meticulously designed and manufactured in our plant in Saronno.

## DESIGN

Our technical staff can assist the customer before and after the sale offering its knowledge and experience for standard and special solutions. Relying on 2D and 3D program we can suggest the most suitable solutions and provide information about the mounting on the machine, process and eventually type of cutting tools, if needed.

## SERVICE

Alberti offers pre-and after sale service including:

- **Repair and Maintenance service**
- **Spare-parts**
- **Customer-support site [www.heads4future.com](http://www.heads4future.com) (Instruction book, tutorial video, 3D drawings, FAQ etc..)**
- **On-line chat**
- **On site support**

# ALBERTI

In 1978 Mr Umberto Alberti manufactured his first angle head becoming soon internationally known thanks to the high **quality, precision and reliability of its products**. Now Alberti offers a wide range of standard heads and customized solutions to satisfy all customer's needs. The technical know-how gained by Alberti is based on a

constant search for new materials and processes as well as the **immense care devoted to the design** from the manufacturing stage through to final assembly. With these characteristics, Alberti successfully introduced and sold their "MADE IN ITALY" products the world over, becoming a market leader in this sector.

## OUR PLUS

Increase productivity with less set-up time
